Portfolio Summary

Total Portfolio Value

\$1,639,303.61

1 Month Ago	\$1,606,668.51
1 Year Ago	\$1,592,093.82
3 Years Ago	\$0.00
5 Years Ago	\$0.00

When was your last review?

If you haven't had a review with your financial advisor in the past 12 months, now is the time to do so. Together, you can discuss changes in - and outside - your life and determine if any changes are needed. Even if no action is necessary, a check-in can help ensure your finances are still on track toward your goals.

Stay informed - stay secure

Did you know you can request to receive alerts in Online Access by text or email? Spending a minute with your settings today can help prepare you to identify unauthorized changes or transactions later. Not signed up for Online Access? Go to edwardjones.com/access to learn more.

Rate of Return

Your Personal Rate of Return for Assets Held at Edward Jones	This Quarter	Year to Date	Last 12 Months	3 Years Annualized	5 Years Annualized
	5.07%	4.44%	8.43%	—	—

Performance Benchmarks

Rate of Return (continued)

Large US Cap Equities (S & P 500)	10.36%	5.65%	14.11%	18.31%	17.21%
International Equities (MSCI EAFE)	12.02%	19.87%	18.32%	15.52%	11.73%
Taxable Fixed Income (Bloomberg Aggregate)	0.85%	3.65%	5.22%	2.77%	-0.80%

Your Personal Rate of Return: Your Personal Rate of Return measures the investment performance of your account. It incorporates the timing of your additions and withdrawals and reflects commissions and fees paid. Reviewing Your Personal Rate of Return is important to help ensure you're on track to achieving your financial goals.

Performance Benchmarks: Your Personal Rate of Return should be compared to the return necessary to achieve your financial goals. However, we understand many investors would like to compare their Personal Rate of Return to market indexes. Keep in mind this may not be an accurate comparison, as your Personal Rate of Return incorporates the timing of your specific additions and withdrawals and your specific investment mix, while published returns of market indexes do not.

These market indexes are used as a general measure of market performance for several major asset classes. Market indexes assume reinvestment of all distributions and do not take into account brokerage fees, taxes or investment management fees.

The performance of your investments is tracked since they have been held in the current account, but no earlier than Jan.1, 2009. This also includes investments you owned during this time period but have since sold. Certain events, including a transfer of an investment between accounts, share class conversion, or change in an investment's identification code (CUSIP) caused by a corporate action, will impact the time frame over which the investment's rate of return is calculated.

Rate of Return information on account statements uses the dollar-weighted calculation. Information used to calculate performance may have been obtained from third parties and Edward Jones cannot guarantee the accuracy of such information.

For the most current information, contact your financial advisor or visit edwardjones.com/performance.

Rate of Return Indexes Definitions

S&P 500 Index: A broad-based measurement of changes in stock market conditions based on the average performance of 500 widely held common stocks. While many of the stocks are among the largest, this index also includes many relatively small companies. It is a float adjusted capitalization-weighted index (stock price times number of publicly available shares outstanding), calculated on a total return basis with dividends reinvested.

MSCI EAFE Index: A market weighted index maintained by Morgan Stanley Capital International composed of foreign stocks from developed markets (excluding the U.S. and Canada).

Bloomberg Aggregate Bond Index: Measures the performance of government, mortgage-backed, asset-backed and corporate securities with at least one year to maturity.

Estimated Yield

The Estimated Yield (EY) in the preceding section compares the anticipated earnings on your investments in the coming year to the current price of the investments. It is based on past interest and dividend payments made by the securities held in your account. Changes in the price of a security over time or in the amount of the investment held in your account will cause the EY to vary. The EY is only an estimate and cannot be guaranteed by Edward Jones or the issuers of the securities. Your actual yield may be higher or lower than the estimated amounts. Estimates for any securities that have a return of principal or capital gain may be overstated. Income cannot be estimated for any securities that do not have an annual payment amount or frequency available at the time of estimation. Yield to Maturity is typically reported for Zero Coupon Bonds as these securities do not have an annual payment.
